I materiali

La gamma di pali *Linea22* è realizzata con molteplici materiali a caratterizzare al meglio l'inserimento nel contesto. L'acciaio inox verniciato, l'acciaio zincato e verniciato, il Corten naturale, tutti lavorati dalle esperte mani di artigiani, danno la possibilità di realizzare effetti o colorazioni personalizzati.

Le finiture

I pali della *Linea22* sono verniciati con finitura a richiesta. Per garantire una lunga durata può essere realizzata una verniciatura "marina" semi-lucida. Realizziamo anche la versione in Corten che conserva le caratteristiche di base del metallo.

Luce

L'opzione retroilluminata è dotata di n. 4 Led Strip da 5/10W/m, 4000K, con grado di protezione IP68.
